

CenturyLink™ Managed Data Bundle

Network downtime is expensive, costing medium-sized businesses nearly \$1 million annually*

Managed Data Bundle overview

From basic Internet to router management, our Data Bundle can support your current and future demands to keep your business running smoothly. We help keep your networks running around the clock because you can't afford disruptions to your business operations.

Product highlights:

- A high-performance, dedicated solution for Internet or private data networking
- A fully-configured, flexible and compatible solution that works with your internal network
- Bandwidth capacities to meet your needs
- Support 24/7/365 from our award-winning account and service teams
- Control of your network, full read/write access while benefiting from our expertise and service support

Managed Data Bundle Solutions include:

The Managed Data Bundle is the ultimate solution that leaves network management to CenturyLink and includes Network Management Services that proactively monitors and manages your router and reports its activities.

- Port types – Internet Port, Private Port (multi-protocol label switching (MPLS)) and Enhanced Port (a single port that offers a cloud-based firewall, Internet access and private data networking)
- Multiple bandwidth speeds – to keep performance at optimal levels
- Routers – ADTRAN® or Cisco® rental options
 - Maintenance offered next business day or 24/7/365 on-site, 4-hour response
 - Pre-configured and based on your specifications with personal assistance from CenturyLink

Contact your CenturyLink Representative today
to find the right Data Bundle for your business.

- Delivered to your location ready for installation and operation
- Data protection at your premises – firewalls configured to your business needs
- Unlimited IPSec tunnel configurations (up to hardware maximum)
- Customized advanced routing configuration – including QoS/border gateway protocol (BGP), generic routing encapsulation (GRE), open shortest path first (OSPF), available over GRE tunnels with CPE configuration
- Network address translation (NAT)/port address translation (PAT) and Demilitarized Zone (DMZ) security configurations
- Multi-port Ethernet switch and router included with 1.5 and 3Mbps CPE

Managed Data Bundle Choices:

Right Size the service to meet your needs

You can choose from 2 levels of service to support your varying applications and needs:

Select

Ideal for a MPLS network with static routing:

- Proactive monitoring and management – 24/7/365 with proactive notification of faults
- Reporting – customer dashboard for viewing real-time reporting and trouble tickets
- Performance-based service level agreements (SLAs)

Comprehensive

Ideal for secure Internet or complex routing requirements:

- Total Customer Agency
- Data protection – firewall management and configuration
- VPN tunnel – IPSec VPN tunnel management
- Complex routing configurations – support for BGP, EIGRP, OSPF

Data Bundle options

Want a bundled solution, but don't want us to proactively manage?

- Ask your sales person to describe Standard and Pro Data Bundle options to you
